Dear Steve,

Thankyou for recommending usage of the Care-Free Water Conditioner which we installed this past irrigation season.

I'm happy to report we have gained pleasing results with our crop yields in the vineyard. We have gained a yield increase of approximately 20% during a period where our irrigation water quality has become increasingly saline. Whilst we received beneficial leaching spring rains, we attribute the majority of this yield increase to the Care-Free Water Conditioner.

We have also observed that the scale forming on the underside of the inline drip hose has largely disappeared and the dripper pattern is now more uniform since the installation of the Care-Free Water Conditioner.

Thanks for all your information and advice.

Dave Reilly
